We will support you to find out: Why and how exactly do we close our heart in relation to ourselves, in our work or in all-day-life? And what exactly do we need to reopen it?

Basic understanding and theories of emotions: Basic and superficial emotions, levels of emotional activation – 4 (5) patterns of human perception. Transpersonal approach to emotions. Techniques of emotional regulation. Emotional intelligence. The heart as the gate way for deeper experiences: Overcoming inner splits (e.g. self-interruptive splits, the inner critic). The magic formula of the heart.

This module will touch the very essence of our life: What makes us happy or unhappy, what makes us feel fear, jealousy or grief, go mad or experience pathological states of mind - in other words, it is about our emotions.

Based on a scientific and experiential conceptual perspective we will assist you in essentially understanding the role of emotions and of your heart. This will help you to get in touch with what I call your “Central Drama”. In this “drama” we unconsciously try to move towards something (the longing pole) and also away from something (our deepest wound). But unfortunately the contrary happens: we never find what we are longing for and end much more often with what we desperately attempt to avoid. The “central drama” is

the key to reach profounder levels of understanding in your personality and reach out to the innermost core of your soul.

Based on the “Central Drama work” we will also deal with different pathological topics, such as depressive and maniac disorders, anxiety and psychosis. The hero's journey can be used as an inner map in mental crisis.

In all of this you will find answers and certainly new questions about how a transpersonal psychotherapist can work from a truly connected, heartfelt and emotional level.

We will use breathing techniques, two-chairs-work, impro-theatre-work, dancing, and meditation.
